10.4.6 Uses Not Mentioned: In the case of a use not specifically mentioned, the requirements of off-street parking for a use which is mentioned and which is most similar to the use not listed shall apply.

SECTION 10.5 SITE DEVELOPMENT REQUIREMENTS

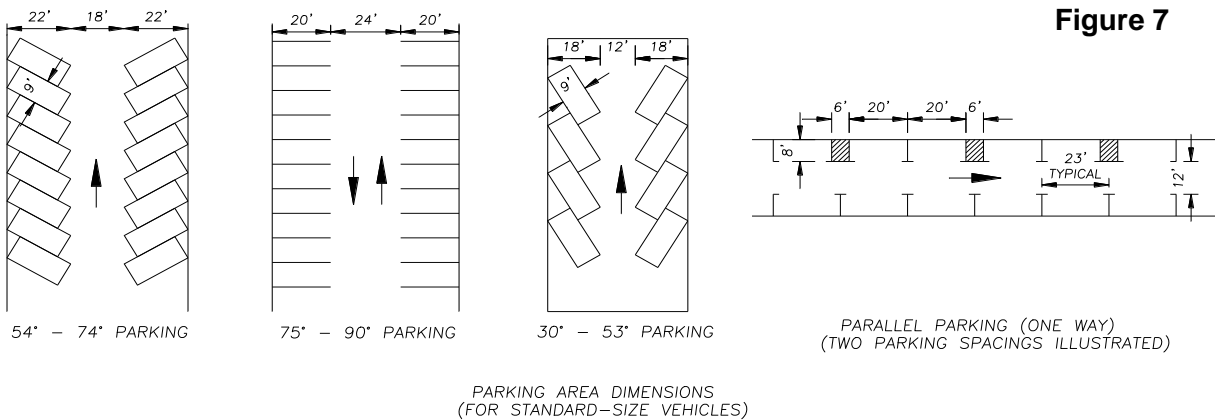

All off-street parking areas shall be designed, constructed and maintained in accordance with the following standards:

10.5.1 Surfacing: All parking areas with ten (10) or more spaces required that are located in the R-2, R-3, C-1 and C-2 districts shall provide adequate storm drainage facilities and provided with a smooth, durable, dustless surface consisting of bituminous asphalt or concrete. Parking lots consisting of 10 or fewer spaces and not otherwise required by the ordinance may utilize an aggregate stone or gravel surface properly graded for storm drainage. Said surface shall be maintained and replaced if necessary during the period of occupancy of the building it serves.

10.5.2 Parking Space Minimum Dimensions: A minimum area of one-hundred eighty (180) square feet consisting of nine (9) feet in width by twenty (20) feet in depth shall be provided for each vehicle parking space. Handicapped parking spaces as required to meet state standards shall be provided and included in the calculations for meeting the standards of this Ordinance.

10.5.3 Maneuvering Lanes: The minimum width of aisles or maneuvering lanes shall be as follows:

- A. For parking angles from 75 degrees to 90 degrees, the maneuvering lane width shall be a minimum of twenty-four (24) feet.
- B. For parking angles from 54 degrees to 74 degrees, the maneuvering lane width shall be a minimum of eighteen (18) feet.
- A. For parking angles from 30 degrees to 53 degrees, the maneuvering lane width shall be a minimum of twelve (12) feet.
- D. For parallel parking, the maneuvering lane width shall be a minimum of twelve (12) feet.

10.5.4 Access to Public Street: Ingress and egress to parking areas shall be provided by means of clearly limited and defined drives as provided for below:

- A. All parking areas must have direct access to a public or private street. Those areas providing more than ten (10) parking spaces with an entry/exit drive may have a drive of not less than twenty (20) feet in width. When one-way drives or boulevards are utilized, the minimum width of each lane shall be twelve (12) feet.
- B. All parking areas providing ten (10) or more spaces shall be designed so as to not make it necessary for vehicles to back directly onto a street and parking shall not be permitted within ten (10) feet of the edge of the public right-of-way.

10.5.5 Landscaping and Snow Storage: All parking lots consisting of more than ten parking spaces shall provide a landscaped area for snow storage with an area equivalent to 15% of the parking area and maneuvering lanes. For example, a parking lot with twenty (20) parking spaces, each consisting of 180 square feet and a maneuvering lane of 100 feet long and twenty-four feet wide, would encompass 6,000 square feet of parking area and maneuvering lane. Therefore, a landscaped area of at least 900 square feet (15%) must be provided for snow storage. Landscaping and planting materials used in such area shall be of a variety that is suitable for the location and hardy to the climate.

Figure 8

10.5.6 Storm Water Drainage: All parking lots of more than ten (10) spaces shall provide for storm water management structures to prevent off-site run-off except as approved by the County Drain Commissioner, or a designated representative of the office of the County Drain Commissioner.

10.5.7 Joint Use of Parking Areas: The use of a single parking area by two or more uses which are individually required to maintain more than ten (10) parking spaces is encouraged whenever such use is practical, and when all requirements for location, design, and construction are met.

A. Capacities: In computing capacities of any joint use of parking areas, the total parking space requirement is the sum of the individual requirements that will occur at the same time each day. When parking space requirements for individual uses occur at distinctly different times during the day, the total required parking spaces may be reduced by action of the Site Plan Review Committee provided that no parking spaces shall be counted which are more than five hundred (500) feet from any entrance to building using joint parking areas.

B. Recording: A copy of an agreement between the joint users of a parking area shall be recorded with the Eaton County Register of Deeds. Such agreements shall guarantee the long term use and maintenance of the parking facility by each party and shall provide that such agreement shall become null and void in the event that the nature of any of the joint uses changes such that additional parking shall be required. The agreement shall also expressly provide the County with

authority, but not the obligation, to enforce its terms, in accordance with the Zoning Ordinance.

10.5.8 Building Additions and Change of Use: Whenever a building, structure, or use is modified, expanded, or changed in use and such activity requires a permit pursuant to this Ordinance, the parking space requirements shall be reviewed and the facilities shall be made to comply with the standards of this Ordinance.

10.5.9 Off-Street Parking Facilities: for trucks, buses and recreational vehicles at restaurants, motels, hotels, service stations, commercial garages, and similar establishments, shall be sufficient in size to adequately service large vehicles and trucks without interfering with other vehicles using the same facility. Parking spaces for such vehicles shall be not less than twelve (12) feet in width and forty (40) feet in length. Access drives for such vehicles shall be designed with adequate turning radius and special provision for slow entry onto public streets and highways. Site Plan Review and approval pursuant to *Article 8* of this Ordinance shall be required for any use proposing to serve trucks, buses or recreational vehicles.

ARTICLE 12 NON-CONFORMITIES

SECTION 12.1 INTENT AND PURPOSE

It is the purpose of this Article to provide for the continuance of lawful uses of land or structures which existed before the enactment of this Ordinance, or before the effective date of an amendment to this Ordinance, governing an otherwise lawful existing use of land or structures. Such non-conformities are permitted to continue under the conditions specified in this Article which are intended to minimize disharmony and incompatibility between uses of land and provide for either the eventual discontinuance or conversion of non-conformities.

SECTION 12.2 CLASSIFICATION OF NON-CONFORMITIES

12.2.1 Illegal Non-conformity: Any use of land or structure which has been established in violation of the provisions of this Ordinance or a previous valid County Zoning Ordinance, having jurisdiction at the time said use of land or structure was established, and any use of land or structure which has been lawfully established under this Ordinance or a previous valid County Zoning Ordinance and subsequently violates the terms of the permit under which it was established shall be termed an illegal non-conformity, except when said illegal non-conformity is in full compliance with the provisions of this Ordinance.

12.2.2 Legal Non-conformity: An existing use of land, lot or structure which does not fully comply with the provisions of this Ordinance, as amended, and either was lawfully established, created, or commenced during a period of time when no valid zoning ordinance was in effect, or was lawfully established under the jurisdiction of this Ordinance, or a previously valid County Zoning Ordinance, and remains in compliance with the terms of a permit issued at that time.

- A. Legal Non-conforming Lot: Any existing lot lawfully created which fails to meet the minimum lot area and minimum lot frontage requirements contained in this Ordinance, and can be shown to have been created as a legal non-conformity by examination of either a legal instrument of transfer or property, or property tax assessment rolls, shall be classified as a non-conforming lot.
- B. Legal Non-conforming Structure: Any existing building, structure, sign, parking area, or other land development which fails to meet the setback, side yard, rear yard, and other requirements of this Ordinance, as amended, and can be shown to have established or commenced as a legal non-conformity shall be classified as a non-conforming structure.
- C. Legal Non-conforming Use: Any use of land located in a district in which it is not permitted by right, or by Site Plan Approval pursuant to this Ordinance, as amended, and can be shown to have established, or commenced as a legal non-conformity shall be classified as a non-conforming use.

12.2.3 Regulation of Non-conformities: Legal non-conformities as defined in *Subsection 12.2.2* shall be permitted to continue provided there is compliance with the following regulations:

- A. Discontinuance or Abandonment: Whenever a nonconforming use has been discontinued for twelve (12) consecutive months, such discontinuance shall be considered conclusive evidence of an intention to abandon legally the nonconforming use. At the end of this period of abandonment, the nonconforming use shall not be re-established and any future use shall be in conformity with the provisions of this Ordinance.
- B. Expansion: No legal non-conforming use shall be permitted to expand, enlarge or extend the land area occupied by the non-conforming use, except the non-conforming use of a building may be extended throughout any portions of a building which can be shown to have been manifestly arranged or designed for such use, and except in the case of surface mining operations, the existing site or holes may be continued and enlarged within the boundaries of the parcel on which the operation was lawfully established.
- C. Structural Alteration: No legal non-conforming use shall undertake a structural change requiring a Construction Permit, pursuant to Public Act 230 of 1972, as amended, specifically, *Section 10(1)* and *Section 105* of the Building Code and *Section R105* of the Michigan Residential Code, as amended, provided, however that mechanical, electrical, plumbing, sewage disposal, and well permits shall be issued when no structural alteration or modification is involved, and provided the strengthening or restoring to safe condition of any building, structure, or part thereof declared to be unsafe by any public official charged with protecting the public health or safety may be structurally altered to the extent necessary to comply with the order of said public official. Provided, further, that a legal non-conforming structure that can be shown to be legally in existence prior to 1981 may be improved or expanded without recourse to the Zoning Board of Appeals pursuant to *Article 4* of this Ordinance, if such improvement or expansion shall not encroach into the setback areas any further than the original (pre-1981) structure encroached into that same setback. For example, a home whose front wall is located too close to the road right of way could be added to as long as no portion of the addition was located any closer to the right of way than the existing home front wall and also provided that the addition meets all other side and rear yard setbacks.
- D. Completion: Any lawful use of land or structure which is under construction in furtherance of the establishment of a building or structure before the enactment of this Ordinance shall be permitted to continue as a legal non-conformity.
- E. Substitution: A legal non-conforming use or a legal non-conforming structure shall not be changed in use to another non-conformity. A legal non-conformity which is succeeded by a use, building or structure in compliance with this Ordinance shall lose its vested right as a legal non-conformity and hereafter continue in compliance with the provisions of this Ordinance.

- F. Re-establishment: A legal non-conforming use or legal non-conforming structure which is damaged by fire, collapse, explosion, high winds, vandalism, or other means beyond the owner's control, may not be replaced but may be repaired to its former condition upon certification of a licensed appraiser or the insurance adjuster whose company insures the property that the cost of repair does not exceed the former value of the buildings and structures located on said property.
- G. Moving: No non-conforming use shall be moved in whole or in part **except** when such moving results in full compliance with the provisions of this Ordinance.
- H. Said letter of intent shall be filed in the office of the Eaton County Community

Development Department prior to any construction related permits being issued. If the future applicant's request for collocation is denied, the tower owner must demonstrate to the Planning commission why collocation is not feasible at the requested site. All application materials and documentation submitted by an applicant shall be reviewed by an appropriate professional with expertise in the field of communication towers and antenna technology. Monies not used for the expert review will be refunded to the applicant after the Planning Commission renders a final decision on the application. At no time shall the total fee for the application and expert review exceed \$1000.00.
- E. After an application is filed with the Eaton County Community Development Department, staff shall determine if the application is administratively complete. The application shall be considered to be administratively complete upon staff's determination or fourteen (14) business days after the Department's receipt of the application, whichever is first. If, before the expiration of the fourteen (14) day period, Department staff notifies the applicant the application is not administratively complete, or notifies the applicant fees required to accompany the application, to include the escrow fee, have not been paid, specifying the amount due, the running of the fourteen (14) business days shall stop until the applicant submits to Department staff the information and/or fees due. Said notification to the applicant by Department staff shall be given in writing or by electronic notification.

SECTION 14.39 SOLAR ENERGY SYSTEM

14.39.1 Definitions:

Solar Energy System – Large: A utility-scale commercial facility, over twenty (20) acres in size, that converts sunlight into electricity, whether by photovoltaics, concentrating solar thermal devices or any other various experimental solar technologies for the primary purpose of wholesale or retail sales of generated electricity off-site.

Solar Energy System – Medium: A utility-scale commercial facility, up to twenty (20) acres in size, that converts sunlight into electricity, whether by photovoltaics, concentrating solar thermal devices or any other various experimental solar technologies for the primary purpose of wholesale or retail sales of generated electricity off-site.

Solar Energy System – Small: A solar energy system installed at individual residential or commercial locations (e.g. roof or ground mounted panels) that are used exclusively for private purposes and not utilized for any resale of any energy, except for the sales of surplus electrical energy back to the electrical grid. These installations are permitted as “Accessory Uses or Structures” under Section 6.2.10.

Solar Array: Any number of Photovoltaic Devices connected together to provide a single output of electric energy or other energy.

14.39.2 Intent and Purpose: It is the intent of this section to regulate the safe, effective and efficient use of solar energy systems in order to reduce or replace the consumption of electricity supplied by utility companies.

14.39.3 Site Plan Requirements: In addition to the regular application for a Conditional Use Permit and payment of fees, the application shall be accompanied by a Site Plan. The Site Plan shall be drawn to a readable scale on a certified boundary survey and shall be sealed by a licensed professional engineer and shall include the following information:

- A. Name and address of owner(s) of land which the Large or Medium Solar Energy System development will take place.
- B. Name and address of person, firm, or corporation responsible if different than owner.
- C. All lot lines and dimensions of each lot or parcel comprising the Large or Medium Solar Energy System.

- I. A revegetation plan shall be submitted and shall include the revegetation and the maintenance of the vegetative cover on the entire solar site. The planting must control site soil erosion and must be maintained throughout out the life of the solar installation. The primary purpose is control of erosion and maintenance of soil quality. Grazing, cropping, and wildlife habitat are acceptable secondary uses. The plan shall include the plant species and the rate of application or planting. Invasive species listed by the Michigan Department of Environmental Quality (DEQ) as restricted or that are on the DEQ Watch List are not allowed. The plan shall address seedbed preparation, fertilization, mulching, and, if needed, irrigation, for establishment and maintenance. Seed tags or seed and plant invoices are to be available to County staff at completion of the installation. The plan shall also include maintenance schedules and methods (mowing, replanting, etc.). The site is subject to annual inspection including for maintenance of the vegetative cover and control of erosion.

- M. Additional detail(s) and information as required by the Eaton County Zoning Ordinance, or as required by the Eaton County Planning Commission.

14.39.4 Regulations and Conditions:

- A. **Minimum lot size:** There is no minimum lot size. Large or Medium Solar

Energy Systems are permitted by conditional use permit and as such will be reviewed and considered for their compatibility with the surrounding area.

- B. **Height Restrictions:** Maximum height of a Solar Array, other collection device, components or buildings of the Large or Medium Solar Energy System, excluding substation and electrical transmission equipment, shall not exceed sixteen (16) feet (as measured from the natural grade at the base of improvements) at any time or location on the property. Substation and electrical equipment shall not exceed one hundred (100) feet.
- C. **Setbacks:**
1. Medium Solar Energy System: All buildings and Solar Arrays shall have a minimum setback distance of sixty-seven (67) feet from any existing public or private road rights-of-way and all other exterior property lines.
 2. Large Solar Energy System: All buildings and Solar Arrays shall have a minimum setback distance of one hundred (100) feet from any existing public or private road rights-of-way and all other exterior property lines. If property surrounding a Large Solar Energy System is zoned Commercial or Industrial, the Planning Commission may allow for a lesser setback down to twenty-five (25) feet.
- D. **Maximum Lot Coverage:** A Large or Medium Solar Energy System is exempt from maximum lot coverage limitations.
- E. **Fencing and Landscaping:** A Large or Medium Solar Energy System shall be completely enclosed by perimeter security fencing to restrict unauthorized access. Fencing height and material to be proposed and reviewed/approved through the conditional use permit process. The perimeter of the Solar Energy System shall also be buffered per Article 17 along any public or private road right-of-way and perimeter of adjacent properties with a residential structure or whenever existing natural vegetation does not otherwise reasonably obscure it from entire perimeter. Berms, screen walls, and fences are prohibited as bufferyards for solar energy systems. Evergreen trees, a minimum of six feet in height at the time of planting, shall be used for all landscape buffers. The Planning Commission may reduce the landscape buffer requirements if adjoining properties are located within a Commercial or Industrial Zoning District. Site disturbance including but not limited to, grading, cut and fill, soil removal, excavation and soil compaction, shall be minimized; soil removal shall be prohibited.
- F. **Signage:** No advertising or non-project related graphics shall be on any part of the Solar Arrays or other components or buildings of the Large or Medium Solar Energy System. This exclusion does not apply to entrance gate(s) signage which shall placed on the fence in a visible area and not exceed six (6) square feet in size. Signage shall be weather durable and should include the name and address of the Large or Medium Solar Energy System owner/operator, a phone number, and contact person from whom additional information may be obtained.
- G. **Lighting:** All lighting for parking lots, driveways, external illumination of buildings or the illumination of signs shall be directed away from and be shielded

from adjacent properties and shall be arranged as to not adversely affect driver visibility on adjacent public or private roads.

- H. **Glare:** All solar panels shall be located or placed so that concentrated solar glare shall not be directed toward or onto nearby properties or roadways (public or private) at any time of the day.
- I. **Distribution, Transmission and Interconnection:** All collection lines and interconnections from the Solar Array(s) to any electrical substations shall be located and maintained underground inside the Large or Medium Solar Energy System. This requirement excludes transmission equipment meant to connect the project substation to the local transmission system.
- J. **Abandonment and Decommissioning:** A Large or Medium Solar Energy System shall be decommissioned following the operational life of the project or at which time it remains non-operational for a period of six (6) months and is considered abandoned. The applicant shall submit a Decommissioning Plan, prepared by a Licensed Professional Engineer, with the Conditional Use Permit application. The Decommissioning Plan shall include, but not be limited to, steps to remove the system, dispose of or recycle its components, restoration of the land and an estimated cost schedule to meet the requirements as follow: The owner/operator of the Large or Medium Solar Energy System is required to remove all equipment, conduit, structures, fencing, roads and building foundations, including any equipment or materials below-grade, offsite for disposal. Upon removal, the ground must be restored to its original condition and the site shall be revegetated to blend with the existing surrounding vegetation. The ground must be restored within six (6) months of abandonment or decommissioning. For agricultural lands, this explicitly entails restoration of the soils to their original USDA classification, as confirmed by a soil survey conducted in accordance with standards of the National Cooperative Soil Survey.
- K. **Financial Guarantees:** If any Large or Medium Solar Energy System is approved for construction under this section, the applicant shall post a decommissioning financial guarantee prior to the start of the construction for an amount necessary to accomplish the work specified in the decommissioning plan as agreed upon by the Eaton County Planning Commission and the applicant. The amount shall be reasonably sufficient to restore the property to its previous condition prior to construction and operation of the Large or Medium Solar Energy System. When determining the amount of each required security, the Planning Commission may also require an annual escalator or increase based on the Consumer Price Index (or the equivalent or its successor). The financial guarantee shall be in the form of a surety bond executed by a reputable surety company authorized to do business in the State of Michigan or a cash bond posted in lieu of a surety bond. The bond shall be returned when all conditions stipulated in the Conditional Use Permit and the Decommissioning Plan have been completed. There shall be no partial release of the bond. This financial guarantee shall be kept in full force and effect during the entire time the Large or Medium Solar Energy System exists or is in place, it shall be irrevocable and non-cancelable.

ARTICLE 15 PUD - PLANNED UNIT DEVELOPMENT DISTRICT

SECTION 15.1 INTENT AND PURPOSE

This Article provides enabling authority and standards for the submission, review, and approval of applications for Planned Unit Developments. It is the intent of this Article to authorize the consideration and use of Planned Unit Development regulations for the following purposes:

- A. To encourage the use of land in accordance with its character and adaptability.
- B. To promote the conservation of natural features and fragile lands and the preservation of important community resources.
- C. To encourage flexibility and innovation in land use and design to protect the rural character of the community and enhance the quality of life in the County.
- D. To promote the efficient use of land to facilitate a more economic arrangement of buildings, circulation systems, land use and utilities.
- E. To promote the enhancement of housing diversity, shopping, traffic circulation, and recreational opportunities for the people of the County.
- F. To promote and ensure greater compatibility of design and use between and among neighboring properties.

A Planned Unit Development must comply with this Article. The provisions of this Article are intended to result in land use and development substantially consistent with the underlying zoning, with modifications and departures from generally applicable requirements made in accordance with standards provided in this Article to ensure appropriate, fair, and consistent decision-making. The Planned Unit Development provisions are not intended as a device for ignoring the Zoning Ordinance or the planning upon which it has been based.

SECTION 15.2 QUALIFYING CONDITIONS:

- A. In order to be eligible for PUD rezoning, the proposed area shall consist of a **minimum of ten (10) acres** if the proposed PUD includes any residential land uses, or **five (5) acres** if no residential land uses are proposed.
- B. Public water and sanitary sewer shall be available to service the site or the proposed development shall include a community water and wastewater system designed and built to ultimately connect to public systems.
- C. A PUD may be permitted in **all** zoning districts.
- D. As a condition of a rezoning to PUD, the applicant must demonstrate that the PUD will result in a recognizable and substantial benefit to the ultimate users and occupants of the project and to the community, where such benefit would otherwise be unfeasible or unlikely. Such benefits may include, but shall not be limited to, the preservation of important natural features, wildlife areas, the

provision of open lands, the provision of a mix of housing types or land uses, and/or innovation in design and project configuration.

SECTION 15.3 DEVELOPMENT REQUIREMENTS

- A. **IN GENERAL.** The Planning Commission shall evaluate each residential PUD application in accordance with the following general standards. The proposed development:
1. shall be designed, constructed, and maintained to be harmonious and appropriate in appearance with the existing or intended character of the general vicinity;
 2. shall not change the essential character of the area in which it is proposed;
 3. shall be served adequately by essential public facilities and services, such as highways, streets, pedestrian ways, police and fire protection, drainage structures, refuse disposal, water and sewer;
 4. shall not create excessive additional requirements at public cost for public facilities and services;
 5. shall be developed in accordance with the intent for a Planned Unit Development as contained herein.
- B. **DENSITY AND DWELLING UNIT COMPUTATION.** The maximum density for residential uses in any PUD shall not exceed 110% of the density which would be permitted in a feasible Comparison Plan, prepared in accordance with County regulations pertaining to the underlying zoning, except as provided in *Section 15.3.C*. For the purposes of this Article, a Comparison Plan shall consist of a feasible layout of dwelling units which may be permitted by right in accordance with the underlying zoning applicable to the proposed site. The Comparison Plan shall include the information required for Site Plan Review pursuant to *Section 8.3* of this Ordinance. The maximum number of dwelling units permitted for the PUD shall be determined based on the number of units that may be properly developed within the net development area of the site multiplied by a factor of 1.1. Provided, however, the maximum density for the proposed development may be adjusted in accordance with *Section 15.3.C* hereof. The net development area is determined by subtracting the following from the gross or total site area:
1. Area within existing or proposed road and/or utility rights-of-way
 2. Areas devoted to non-residential uses.
 3. Areas located within regulated wetlands, designated floodways and slopes in excess of 33%; provided, however, that for the purposes of the dwelling unit computation, such areas may be included in the non-developed portion of the site.
- In the case where the proprietor proceeds in phases and develops only a portion of the total proposed development at one time, each phase shall consist of land use(s) planned and developed in such a way that the

average of all completed phases shall not exceed the maximum average density for the entire development. This may be accomplished through the utilization of conservation easements, or other lawful means, as approved by the County.

MAXIMUM PERMITTED DWELLING UNITS IN PUD with 35% open space (Comparison plan density times 120%)		89.8 Units

C. **OPEN SPACE:** Each PUD shall contain open space areas equal to a minimum of twenty-five (25%) percent of the total site area which is devoted to residential use. Such open space shall be maintained in perpetuity by the owner, owner’s agent or homeowner's association and shall be set aside for the common use of the home or lot owners within the PUD with recorded assurances satisfactory to the County that the required open space shall be properly maintained in perpetuity. In any such recorded assurances, the County shall be identified as having the right, but not the obligation, to enforce the conditions, covenants and restrictions placed on the open space.

To the extent that the proposed development provides open space as defined in this section in excess of twenty-five (25%) percent of the total site area, the maximum density of the development may be increased. For the purposes of this paragraph, for each one (1%) percent additional open space as defined herein in

excess of twenty-five (25%) percent which is proposed, the overall density of the project may be increased by one (1%) percent up to a maximum of one hundred-twenty (120%) percent of the density provided in the feasible Comparison Plan. (Refer to the chart above.)

For purposes of this section, open space shall only be considered to be those areas having a minimum dimension fifty (50) feet by one hundred (100) feet. Land in streets, sidewalks, parking areas or in required yard or setback areas shall not be considered as open space. Open space areas may include open air recreational uses and/or unimproved natural areas. The Planning Commission shall have the discretion to approve alternative open space uses, such as public or semi-public recreational use. Open space may include incidental and accessory buildings and structures as determined by the Planning Commission.

- D. **LANDSCAPING AND GRADING:** In order to keep all graded areas and cuts to a minimum, to eliminate unsightly grading and to preserve the natural appearance and beauty of the property as far as possible while enabling an economic development, specific requirements may be placed on the size of areas to be graded or to be used for building and on the extent of removal of trees and natural features. All areas indicated as natural open space shall be undisturbed by grading, excavation or structures to the greatest extent possible. Where drainage improvements, utility lines, hiking or bicycle paths or similar recreational improvements are to be placed in natural areas, best engineering and design practices shall be used to make such improvements as unobtrusive as practicable. The PUD Concept and Final Development Plan shall include provision for the retention of existing landscape features and for the installation of appropriate new plantings of varying species, dimensions and design.
- E. **PERMITTED USES WITHIN A PUD:** In the PUD District, the Planning Commission shall permit principal and/or accessory uses, and may permit any conditional uses, which are authorized in either the underlying zoning district(s) or the corresponding districts as set forth in the following table. Such uses must be compatible with the design principles and purposes of this Article and the land uses in the general vicinity of the project:

	Underlying Zoning *					
	RC & LA	R-1	R-2 & R-3	C-1	C-2	I
Uses permitted in a residential PUD are limited to those permitted in the corresponding Zoning Districts	R-1	R-1 R-2 R-3	R-1 R-2 R-3 C-1	R-1 R-2 R-3 C-1	R-2 R-3 C-1 C-2	I

* For proposed PUDs with more than one underlying zoning district, the standards of the most restrictive district would apply.

If two-family or multi-family housing units are permitted in the PUD District which would otherwise not be permitted in the underlying zoning, **at least 60% of the land area** in the PUD district shall be reserved and used for land uses that are permitted in the underlying zone district and the remaining **40%** of the land area may be developed at the density and use as stipulated in the chart included in this paragraph 3(e).

SECTION 15.4 APPLICABLE REGULATIONS

- A. Unless specifically waived by the Planning Commission through the provisions of *Section 15.4.B* below, all regulations of the underlying zoning district prior to the PUD request relative to lot size, lot width, yard area, lot coverage, structure height, setback, signs, parking and loading, landscaping, general provisions and other applicable regulations shall apply. In projects with more than one underlying district, the most restrictive district regulations within this Ordinance shall apply.
- B. Consistent with the Planned Unit Development concept, and to encourage flexibility and creativity in development, departures from the regulations outlined in *Section 15.4*. may be granted at the discretion of the Planning Commission as part of the approval of a Planned Unit Development. Such departures may be authorized if there are features or planning mechanisms incorporated into the project which would achieve the objectives of each of the regulations from which a departure is being requested.
- C. The stages or phases of any PUD development shall be so structured and scheduled that, if later stages or phases of the development are not implemented, the initial stage(s) shall be consistent with the provisions of this Article and shall not detract from the feasibility of developing the remaining portion of the subject PUD area in an appropriate and desirable manner. The Planning Commission shall determine that each phase of a PUD project shall be capable of standing on

its own as a desired land use, in the event that subsequent phases are not completed.

- D. Private roads within the PUD, if any, shall conform to the minimum road construction standards established by the Eaton County Road Commission for public roads, the requirements of Section 14.28 of this Ordinance, and the Applicant must pay all costs of inspection and maintenance. All necessary agreements pertaining to private road construction and maintenance shall be reviewed and approved by the County and must be executed and recorded prior to the commencement of construction.
- E. The proposed location and arrangement of structures shall not have a detrimental effect on residents of existing developments in the vicinity of the proposed PUD. Open space shall be used as a transitional device to buffer surrounding uses, as appropriate.
- F. Any existing use of property zoned PUD (including property with an approved final development plan) shall be subject to the provisions of Article 12 of this Ordinance pertaining to non-conforming land uses.

SECTION 15.5 PUD DESIGN CONSIDERATIONS

A proposed Planned Unit Development shall take into account the following specific design considerations, as they are necessary to ensure compliance with all applicable regulations and to ensure the compatibility of the project with adjoining properties and the general area in which the property is located.

- A. Perimeter setbacks, as they may be modified in accordance with *Subsection 15.4B* of this Ordinance.
- B. Street drainage and utility design with respect to location, availability, ownership, and compatibility.
- C. Underground installation of utilities.
- D. Separation of pedestrian and bicycle paths from vehicular traffic.
- E. Achievement of integrated and harmonious development with respect to signs, lighting, landscaping, and construction materials.
- F. Noise reduction and visual screening mechanisms from adjoining residential uses.
- G. Ingress and egress to the property with respect to automotive and pedestrian safety and convenience, traffic flow and control, street capacity, and emergency access.
- H. Off-street parking, loading, refuse, and other service areas with respect to ingress and egress and the potential effects of noise, glare, vibration, and odor emanating from such facilities on adjoining properties and uses.
- I. Screening and buffering with respect to dimensions and character.
- J. Yard areas and other open space.

- K. Density and intensity of development expressed in terms of percent of gross and net land area coverage and/or gross and net housing units per acre and the height of buildings and other structures.
- L. The preservation of natural resources and natural features.

SECTION 15.6 APPLICATION AND PROCESSING PROCEDURES

- A. **IN GENERAL.** The procedure for application, review and approval of a PUD shall be a two (2) part process.
 - 1. The first part shall be application and approval of a Concept Development Plan, which shall require a legislative enactment amending the Zoning Ordinance so as to reclassify the property to PUD. Such action shall confer upon the applicant concept approval for the length of time established by the County Board of Commissioners in the amendatory ordinance granting the PUD designation.
 - 2. The second part of the review and approval process shall be the application for approval of a Final Development Plan for the entire project or for any one or more phases of the project. Final Development Plan approval shall require the granting of Site Plan approval by the Planning Commission using the standards for Site Plan approval set forth in to *Article 8* of the Zoning Ordinance.
- B. **EFFECTS:** The granting of a Planned Unit Development rezoning application shall require an amendment of the Zoning Ordinance and the Zoning Map constituting a part of this Ordinance. An approval granted under this Article including all aspects of the Final Site Development Plan and conditions imposed shall constitute an inseparable part of the Zoning Ordinance and an unique zoning district incorporating the provisions of the Final Site Development Plan. Each approved PUD district will be assigned a unique identification number by the Community Development Director, which shall be used to reference the standards, restrictions, uses and all other aspects of the particular PUD district.
- C. **PREAPPLICATION CONFERENCE:** Prior to the submission of an application for Planned Unit Development, the applicant shall meet with the Community Development Director, and/or such consultants as deemed appropriate. The applicant shall present at such conference, or conferences, a sketch plan of the Planned Unit Development, and the following information:
 - 1. A **legal description** of the property in question;
 - 2. The **total number of acres** to be included in the project;
 - 3. A statement of the **approximate number of residential units** and/or the approximate number, type, and square footage of non-residential units;
 - 4. A **Comparison Plan** indicating the maximum number of dwelling units that may be developed on the site under the terms of the existing Zoning

Ordinance and District, taking into account unbuildable areas as set forth in *Section 15.3.B*

5. The approximate **number of acres to be occupied** and/or devoted to or by each type of use;
6. **Departures from the regulations** of the Ordinance which may be requested;
7. The number of acres to be preserved as **open space** or recreation space; and
8. All known **natural resources** and **natural features**.
9. The **benefits that are expected** to result from the adoption of the PUD provisions pertaining to the subject site.

15.6 herein and transmit its recommendations for changes or modifications of the Preliminary Concept Development Plan to the applicant.

- F. **PUBLIC HEARING**: Prior to setting the public hearing, the applicant shall submit all required and requested information to the County. Once complete, the Community Development Director shall transmit the complete application to the Planning Commission. The Planning Commission, at a regular or special public meeting, shall set a time and place for a public hearing and provide for the legal publishing and proper posting of notices of such hearing, time and date in a newspaper of general circulation in the County, the first to be printed not more than thirty (30) days nor less than twenty (20) days and the second not more than eight (8) days before the date of the hearing. Not less than twenty (20) days notice of the time and place of such hearing shall also be given by mail to each electric, gas, pipeline, and telephone public utility company that registers its name and mailing address with the County for the purpose of receiving such notice and to each railroad operating within the district or zone affected. Planning Commission shall give a notice of the proposed rezoning to the owner of the property in question, to all persons to whom any real property within three hundred (300) feet of the premises in question is assessed, and to the occupants of all single and multi-family dwellings within three hundred (300) feet. The notice shall be delivered personally or by mail to the respective owners and tenants at the addresses given in the last assessment role. If the tenant's name is not known, the term "occupant" may be used.

If the notice is delivered by mail, an affidavit of mailing shall be filed with the Planning Commission before the hearing. Such notices shall include the places and times at which the tentative text and map change may be examined plus the following:

1. Describe the nature of the PUD use requested.
2. Indicate the property which is the subject of the PUD request.

4. Indicate when and where written and oral comments will be received concerning the request.

SECTION 15.7 STANDARDS FOR ZONING APPROVAL

Following the public hearing, the Planning Commission shall recommend to the County Board of Commissioners either approval, denial, or approval with conditions of the PUD rezoning request and Preliminary Concept Development Plan. In making its recommendation, the Planning Commission shall find that the proposed PUD meets the intent of the PUD District and the following standards:

- A. Granting of the Planned Unit Development rezoning will result in a recognizable and substantial benefit to the ultimate users of the project and to the community where such benefit would otherwise be unfeasible or unlikely to be achieved.

- B. In relation to underlying zoning, the proposed type and density of use shall not result in a material increase in the need for public services, facilities, and utilities, and shall not place a material burden upon the subject or surrounding land or property owners and occupants or the natural environment.
- C. The proposed development shall be compatible with the County Comprehensive Development Plan and shall be consistent with the intent and spirit of this Article.
- D. The Planned Unit Development shall not change the essential character of the surrounding area.
- E. The proposed development shall be under single ownership or control such that there is a single person or entity having responsibility for completing the project in conformity with this Ordinance. This provision shall not prohibit a transfer of ownership or control upon due notice to the Community Development Department.
- F. X. DCA-6-04-2

1. Amendment to **Article 6.2.2**

Correct the text of **Article 6.2.2** to allow the creation of more than one flag lot from parcels provided that they do not have adjoining or abutting entrances. By eliminating the text “one (1) flag lot may be created.”

2. Amendment to **Articles 14.8, 14.9 and 14.12** revises **Section 14.8 and 14.9** and eliminates **Section 14.12**:

Consolidated and clarified the three sections **14.8, 14.9, and 14.12**. **Section 14.8** defined multiple family dwellings and duplexes, **section 14.9** discussed the creation of duplexes (or the conversion of single family homes to duplexes), and the **section 14.12** defined multiple family dwellings again in almost identical language, but called them “group housing.” The goal of this revision was to consolidate these three sections into two and clarify the requirements for structures that house more than one dwelling unit.

3. Amendments Proposed to **Article 4**:

The proposed amendment clarifies that the Board of Appeals may not consider or grant variances from the land uses

allowed in each zoning district. To allow the granting of a variance from the basic land uses that are permitted in each zoning district would be a de facto re-zoning of a parcel to a zoning district designation that allowed such use. This amendment clarifies that the correct procedure for changing the uses allowed on a parcel is to rezone the parcel, not get permission to vary from the allowed uses.

4. Amendments to **Articles 5, 10 and 14:**

The text throughout the ordinance was corrected to use the same terms for land uses and to improve the consistency of the Development Code. For example, a structure with two dwelling units is now referred to as a “duplex dwelling” throughout the ordinance.

Also, the definition of “Farm” (**Art. 5.3.6F**) changed to reflect current definition used by the State of Michigan.

5. Amendments to **Article 10** Parking Space Requirements:

This amendment re-ordered the land uses and their parking requirements into alphabetical order so that they are easier to look up. Land uses mentioned elsewhere in the ordinance, particularly in **Articles 5, 7, and 14**, have been added to the table and language clarified to refer to them with consistent terms. This will reduce the staff interpretations of “uses similar to” and improve the clarity of the number of parking spaces required for various land uses allowed under the ordinance. The requirements for number of spaces and the calculations used to determine the number of required spaces have also been revised to reduce the required amount of impervious surface required for land uses.

6. Amendments to **Articles 5, 7, and 14:**

The amendment changed State Licensed Residential Facility (SLRF) to Foster Care Facility. It also clarified the number of residents allowed for the home to be considered a use permitted by right (6 or fewer) or a use permitted with a conditional use permit (7-12).

Y. DCA-9-05-04 Amendments to **Article 14.13:**

1. The following language was added: If the proposed home business activity does not create retail sales on the property, does not employ anyone other than the residents of the home, does not generate traffic to the property, does not

have signage, or create noise, dust, vibration, odor, smoke, glare, electrical interference, or fire hazard to a greater extent than normal or substantially increase the use of services such as water, sanitary sewer, storm drainage, or garbage collection, the activities may be conducted within the home or accessory structure without having to obtain a conditional use permit. Prohibited businesses are identified in Article **14.13.3**.

2. The following language was deleted: I. A Home business is for the sale of goods and services made and/or assembled on the home business property. At any time, no more than 15% of the products and materials sold as a part of the business may be made and/or assembled off of the approved Home Business property.

Amendments to Article **14.14**:

1. The following language was added: If the proposed home occupation activity does not create retail sales on the property, does not employ anyone other than the residents of the home, does not generate traffic to the property, does not have signage, or create noise, dust, vibration, odor, smoke, glare, electrical interference, or fire hazard to a greater extent than normal or substantially increase the use of services such as water, sanitary sewer, storm drainage, or garbage collection, the activities may be conducted within the home or attached garage without having to obtain a conditional use permit or site plan review.
